

TOPAZ

Smart Control at Your Touch

DRGEM's **TOPAZ** has taken a step forward with Smart Control functions using a tablet, offering greater safety, efficiency, and convenience.

Safe Remote Control

Control TOPAZ remotely via Wi-Fi, effectively minimizing radiation exposure by allowing operators to work from separate spaces. Operators can adjust exposure settings either directly on the TOPAZ touchscreen or remotely via the tablet, providing greater flexibility and convenience.

Remote Precision Movement

Enhance handling in narrow spaces with advanced remote control features that allow precise adjustments. Once positioned, operators can use a tablet to make fine-tuned movements of TOPAZ, ensuring optimal placement without manual repositioning.

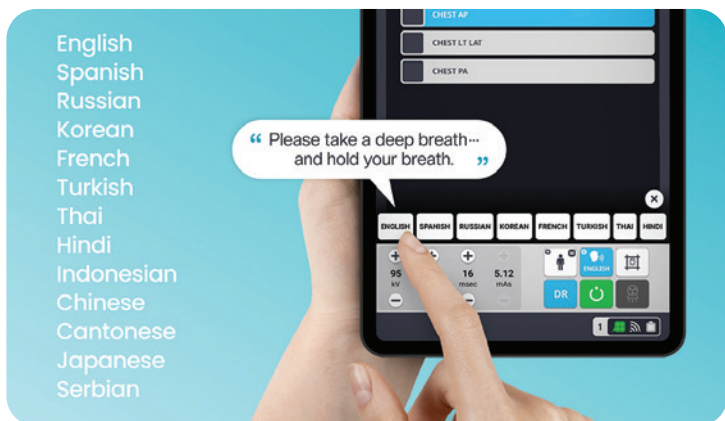

Live Video Streaming

TOPAZ offers real-time monitoring of patient positioning, seamlessly accessible on both the built-in touch monitor and especially the tablet, bringing precision and safety right to your fingertips wherever you are.

Live Voice Streaming

Speak to patients in real time during procedures through TOPAZ's Live Voice Streaming feature on the tablet, ensuring clear guidance and supporting confident care.

Multilingual Preset Voice Guidance

Enhance patient cooperation during X-ray exams with the Multilingual Preset Voice Guidance feature on the tablet, with the option to add more languages. Operators can easily instruct patients to hold their breath and more in their native language, ensuring effective communication and improving the exam experience.

RADMAX on Tablet

Operate RADMAX software features directly from the tablet, including worklist access, procedure synchronization, image review, battery monitoring, detector settings, and collimator lamp control for a smoother mobile workflow.
